SUMMARY

Senior software engineer with four years building Laravel and PostgreSQL systems at scale. Core engineer on a multi-tenant ERP/CRM used by 6,000+ employees, delivering across seven business domains and both the backend and Next.js front end. Independently designed and shipped a multi-sided delivery platform and a multi-currency travel booking platform, backend through mobile. Top Rated on Upwork with 100% Job Success.

EXPERIENCE

The Address Investments — Senior Software Engineer

Jan 2025 – Present

Full-time, onsite · Cairo, Egypt

Laravel 12 · PHP 8.4 · PostgreSQL · Redis · Octane · Next.js 16 · React 19 · TypeScript

- Core engineer on the multi-tenant ERP/CRM used by **6,000+ employees** across two business units.
- Own the Leads, Deals, Units, HR, Learning, Supply Chain and Reservations domains.
- Built the lead rotation and assignment engine with full audit history, and Meta Ads lead capture into the CRM.
- Built **contract OCR** that verifies extracted deal data across several providers before it reaches finance.
- Built HR document generation that reads salary from Odoo at render time and never stores it.
- Integrated **Odoo v19** two-way sync for clients and reservations over REST and webhooks.
- Added Typesense search and Reverb real-time updates. Hardened sign-in with OAuth2, WebAuthn and TOTP.
- Cut response times with Octane, Redis caching and PostgreSQL query tuning.
- Shipped collaborative editing and in-app video on the Next.js front end.

Giantrex — Partner, Software Engineering

Nov 2025 – Present

Games and VR studio expanding into software products · Remote

Laravel 12 · PostgreSQL · Redis · Octane/RoadRunner · Next.js · React 19 · Flutter · Stripe · Shopify

- Own backend architecture for the studio's software products.
- **Akaza Travel** — principal engineer on a platform selling hotels, guided tours and airport transfers from one basket.
- Integrated **Hotelbeds** for hotel search and booking, capturing rates and cancellation terms at the moment of booking so a later supplier change cannot alter a confirmed reservation.
- Built the tour availability engine — calendar, blackout dates, per-guest-type pricing and capacity — and route-by-vehicle-class pricing for transfers.
- Built the payments layer: Stripe and PayPal behind one gateway interface, with exact integer arithmetic on every multi-currency amount.
- Built the promo engine with targeted campaigns, generated codes, eligibility rules and redemption reporting, plus customer records, templated notifications, PDF vouchers and revenue reporting, in English, German and French.
- **Rahwan** — sole backend engineer on a delivery and inventory platform serving vendors, delivery agents, warehouse staff and customers.
- Modelled the parcel lifecycle across eleven states and two legs, vendor to warehouse to customer, with QR-verified custody at every handover and OTP confirmation on delivery.
- Built its money layer: a credit/debit ledger reconciling cash-on-delivery collections, shipping fees and order subtotals into vendor wallets, settled as payouts or collections.
- Shipped the Next.js admin and customer portal with live map tracking and Arabic/English RTL, a Flutter app serving both vendors and delivery agents, and a Shopify app that pulls merchant orders in with live checkout rates and fulfillment write-back.

AuraKore — multi-tenant ERP/CRM SaaS

Feb 2026 – Present

- Built a multi-tenant SaaS platform with **per-tenant schema isolation** and role-based access at both tenant and platform level.
- Added permission caching, brute-force lockout on sign-in, and full audit trails.
- Set up CI/CD on **GCP Cloud Build** across three environments, behind an Apigee gateway.

TSR Ventures & Solutions — Welhof, Netherlands

Sep 2024 – Mar 2025

- Backend for a Dutch e-commerce platform selling refurbished home appliances.
- Built product and category management and warehouse stock tracking in PHP, Yii and MySQL.

Leadmedia — Canada

2022 – 2024

- Built custom websites and web applications for Canadian real-estate brokers.

ACME IES — Full Stack PHP Developer

Jun 2022 – Jan 2025

Full-time, onsite · Cairo, Egypt

Laravel · PHP · MySQL · Node.js · Next.js · Linux

- Egyptian Customs Authority** — microservices backend and registration APIs for brokers, agents and stakeholders, behind multi-factor authentication.
- National Archives of Egypt** — admin platform for the national digital archive, with role-based access and a custom permission model.
- National Silos of Egypt** — grain logistics platform on IBM Cloud Paks, with Node.js services reading weighbridge scales at silos nationwide.
- Exponile** — e-commerce marketplace. Order processing, authentication, product search and filtering.

TECHNICAL SKILLS

Languages	PHP, JavaScript, TypeScript, SQL
Backend	Laravel, Yii, Node.js, REST APIs, GraphQL, Laravel Octane, Passport / OAuth2, Livewire
Frontend	React, Next.js, Tailwind CSS, Flutter
Data & Search	PostgreSQL, MySQL, Redis, Typesense, Laravel Scout, Eloquent and query optimisation
Architecture	Domain-Driven Design, Clean Architecture, Multi-tenancy, Microservices, Event-driven design
DevOps	Docker, Docker Compose, GitHub Actions, Nginx, Linux, GCP Cloud Build, Laravel Forge, Render
Integrations	Shopify (Admin GraphQL, Carrier Service), Stripe, PayPal, Hotelbeds, Odoo, Meta Ads, WhatsApp Cloud API, Firebase, Twilio
Quality	PHPUnit, Pest, Vitest, Sentry, Laravel Telescope
